

The Magna Society

What is the fictitious truth, and why is this of interest to you?

What is the fictitious organization/entity that is presenting this material?

How could this project become a “benevolent untruth”?

The fictitious truth I am interested in creating is the Magna Society, a collective of researchers, astronomers, archeologists, geologists and scientists/hobbyists/civilians who have experienced extreme magnetic phenomenon, in large scales, such as remote caves, mountains, bodies of water and canyons, and also in tiny scales, like the movements of insects.

The Magna Society came together as people native to large magnetic sites started noticing irregular shifts in the polarities. Pipes in village homes started to turn in particular directions, the screws in car parts started to shift, along with other phenomenon as people closest to magnetic sites started noticing their hair acting more like filament.

These occurrences have been occurring at a rapid speed in the last 12 years. Some in eastern Asia say it is due to the effect of the a chain of events that took place in the last year of the Golden Dragon. Though this merits further study, one would have to go to their site for further evidence of this and historical and astronomical significance. The Magna Society is based in Abya Yala, or Turtle Island. The founders of the Magna Society are non-hierarchical, and have only created this society to educate the rest of the earth of the implications of these magnetic irregularities.

In fact, over years of international research and cooperation, the Magna Society has come to understand the source of the Magnetic irregularities. In many remote sites, the planets of our solar system have been revealing themselves in startling formations, creating messages understood by the people who live under the stars. The people who live under the stars are an endangered species of human who lives with oneness in their surroundings. They are also known for their daily death ritual, where once a day they witness death or experience their own death before their death, through various different rituals throughout the solar year. The people of the stars used to be the majority of people thousands of years ago, but in recent times their way of life has been encroached upon and endangered, through the introduction of the lightbulb, gas, oil, and guns.

The founders of this project seek to share a benevolent truth about the anger of the planets. The remaining people of the stars have alerted their trusted allies with information that will startle the world, and fore warns a destruction we can still avoid. The people of the stars have said that 2/3 of the people on planet earth will need to align themselves to the magnetic polarities of the planets which seek to work through them. By this, humans must learn to find the planets inside of them, as the planets formation of this universe is what caused the human, who the ancients have identified have 9 glowing balls inside of them. The Planets are alive, and sentient, and they are talking to us, we must listen, or a 1.5 kilojoule action emitted from Jupiter, the Godfather planet, can send a ripple effect that can destroy Earth in 26 hours.

Join the Magna Society and learn how we can prevent this.
